Gautam Jain

Aspiring Software Engineer | Cloud & Backend Enthusiast

+91 9145970635 | gautam0336.be23@gmail.com | LinkedIn | GitHub | LeetCode

Summary

Aspiring Software Development Engineer with hands-on experience in building scalable backend systems and full-stack applications using the MERN stack and Spring Boot. Strong foundation in data structures and algorithms, with over 350 high-quality problems solved on LeetCode. Proficient in REST API design and cloud deployment on AWS (EC2, Load Balancer, Nginx). Experienced in developing real-time and distributed systems with a focus on performance, scalability, and clean architecture. Seeking to collaborate with experienced engineers and build impactful, production-grade systems.

Key Achievements

Dean's List & Mentor's Mind - Academic recognition for outstanding performance at Chitkara University.

Technical Skills

Languages: Java | C++ | Python | SQL | JavaScript

CS Fundamentals: Data Structures & Algorithms | OOP | Computer Networks | Operating Systems

Frontend: React.js | HTML5 | CSS3

Backend: Node.js | Spring Boot | REST APIs | JWT Authentication

Databases: MongoDB | MySQL

Cloud & DevOps: AWS EC2 | S3 | Load Balancer | Target Groups | Nginx | Docker

Tools & Platforms: Git & GitHub | VS Code | Postman | Figma | Canva

Academic Projects

Multiplayer Gaming Platform

MERN Stack | Socket.io | JWT | WebSockets | AWS EC2 | Nginx

- Built a real-time multiplayer system using Socket.io and WebSockets handling concurrent users with low-latency state synchronization.
- Designed scalable backend architecture with JWT authentication and session handling for multi-user environments.
- Deployed on AWS EC2 with Nginx reverse proxy and tested load distribution using Elastic Load Balancer.

Smart PDF Analysis System

Python | NLP | Machine Learning | Docker | REST APIs

- Developed a persona-based PDF analysis system that processes multiple documents using NLP and ML to extract domain-relevant insights.
- Containerized the full pipeline in Docker and exposed results as structured JSON via REST APIs for offline, production-ready deployment.

Expense Tracker - Personal Finance Manager

Spring Boot | MySQL | TypeScript | JWT | AWS EC2

- Built a secure full-stack web application with Spring Boot REST APIs and a Next.js frontend, featuring JWT-based authentication and dynamic expense categorization.
- Deployed on AWS EC2 using Nginx, with real-time analytics dashboards and cloud-ready architecture configured for auto-scaling and load balancing.

Education

Bachelor of Engineering - Computer Science & Engineering — 2023 - Present

Chitkara University, Rajpura, Punjab — CGPA: 8.45 / 10

Higher Secondary (10+2) - Science (PCM), CBSE — 2021 - 2022

Central Academy Sr. Sec. School, Chittorgarh, Rajasthan — 76.5%

Secondary (Class 10) - CBSE — 2019 - 2020

Central Academy Sr. Sec. School, Chittorgarh, Rajasthan — 87.2%

Certifications

Google: The Bits and Bytes of Computer Networking — Google / Coursera

Practical knowledge of TCP/IP, OSI model, routing protocols, DNS, VPNs, and network security fundamentals.

Google Cloud Study Jams — Google Developer Group

Completed hands-on labs covering Vertex AI, Gemini, GenAI app deployment, and cloud networking on Google Cloud Platform.
